

Class Topic

- 1) create a list of data**
- 2) create a series from the list**
- 3) create a dataframe from the series**
- 4) dataframe convert series**
- 5) create a series for 2 integer columns**
- 6) create a dataframe from the list and rename the columns.**
- 7) create a series from the dataframe**
- 8) create a dictionary**
- 9) create a series from the dictionary**
- 10) set to series and dataframe**
- 11) Tuple to series and dataframe**
- 12) Data Types**
- 13) check a dataframe and check the data types**
- 14) Neumeric data types**
- 15) object**
- 16) datetime**
- 17) create a list of dates**
- 18) create a dataframe with a dataframe column**
- 19) check the data type of the date column**
- 20) `pd.to_datetime(dates)`**
- 21) series convert**
- 22) read Excel with `xlsx`**
- 23) read csv**
